

PETITION TO THE HOUSE OF COMMONS IN PARLIAMENT ASSEMBLED

We, the undersigned residents of Canada, draw the attention of the House to the following:

THAT hundreds of thousands of Canadians suffer from debilitating illnesses and diseases such as Parkinson's, Alzheimer's, Diabetes, Cancer, Muscular Dystrophy and Spinal Cord Injury;

THAT Canadians support ethical stem cell research which has already shown encouraging potential to provide cures and therapies for these illnesses and diseases;

THAT non-embryonic stem cells, which are also known as adult stem cells, have shown significant research progress without the immune rejection or ethical problems associated with embryonic stem cells;

THEREFORE your petitioners call upon Parliament to focus its legislative support on adult stem cell research to find the cures and therapies necessary to treat the illness and diseases of suffering Canadians.
